

TX-I/O™

Super universal modules TXM1.8X TXM1.8X-ML

- **Two fully compatible versions:**
 - **TXM1.8X:** 8 inputs/outputs with LED signal / fault indication
 - **TXM1.8X-ML:** As TXM1.8X, but with additional local override facility with LCD display (LO/ID to ISO 16 484-2)
- **8 universal I/O points, individually configurable as**
 - Digital input: maintained contact, pulse or counter
 - Analog input: sensor, 0..10V, 4..20mA
 - Analog output: 0..10V, 4..20mA (I/O points 5 ... 8)
- **Compact DIN format, small footprint**
- **Separate terminal base and plug-in I/O module for convenient handling**
 - Self-establishing bus connection for maximum ease of installation
 - Terminal isolation function for fast commissioning
 - I/O module replaceable in seconds, without rewiring and without affecting the full functioning of the remaining I/O modules
- **All terminals are directly on the I/O modules, allowing direct connection of field devices without additional terminal strips.**
- **Simple strategy for operation and display**
 - I/O status LED for each I/O point; mode of operation (N/C or N/O) and brightness depend on I/O function
 - LEDs and LCD for fast diagnostics
- **Double-sided labels for identification of all I/O points**

Functions

The modules support the following I/O functions:

Function	Signal type	Description
Status signal	D20	Volt-free, interrogation (maintained contact), N/O contact
	D20R	Volt-free, interrogation (maintained contact), N/C contact
Status pulses	D20S	Volt-free, N/O contact, interrogation (pulse)
Counter pulses	C	Volt-free, N/O contact, interrogation (pulse)
		Counting frequency max. 100 Hz (electronic counter) max. 25 Hz (mechanical counter)
Voltage, current, resistance and temperature	U10	DC voltage 0 ... 10 V
	I420	DC current 4 ... 20 mA
	I25	DC current 0 ... 20 mA <i>Please note that the max. current is 20 mA!</i>
	P1K	Resistance Pt 1000 ohms and resistance transmitter
	R2K5	Resistance 2500 Ω
	R1K	Temperature sensor LG-Ni 1000 ohms
	Ni1K	Temperature sensor LG-Ni 1000 ohms
	Pt1K 375	Temperature sensor Pt 1000 (USA)
	Pt1K 385	Temperature sensor Pt 1000 (Europe)
	T1	Temperature sensor PTC
	NTC10 K	Temperature sensor NTC 10 K
NTC100 K	Temperature sensor NTC 100 K	
Proportional output signals	Y10S	Proportional control output, DC 0 ... 10 V, with storage of control value
	Y420	Proportional control output, current DC 4 ... 20 mA (I/O points 5 ... 8 only)

For a detailed description of these functions, please refer to document CA110561, "TX-I/O™ functions and operation".

Compatibility

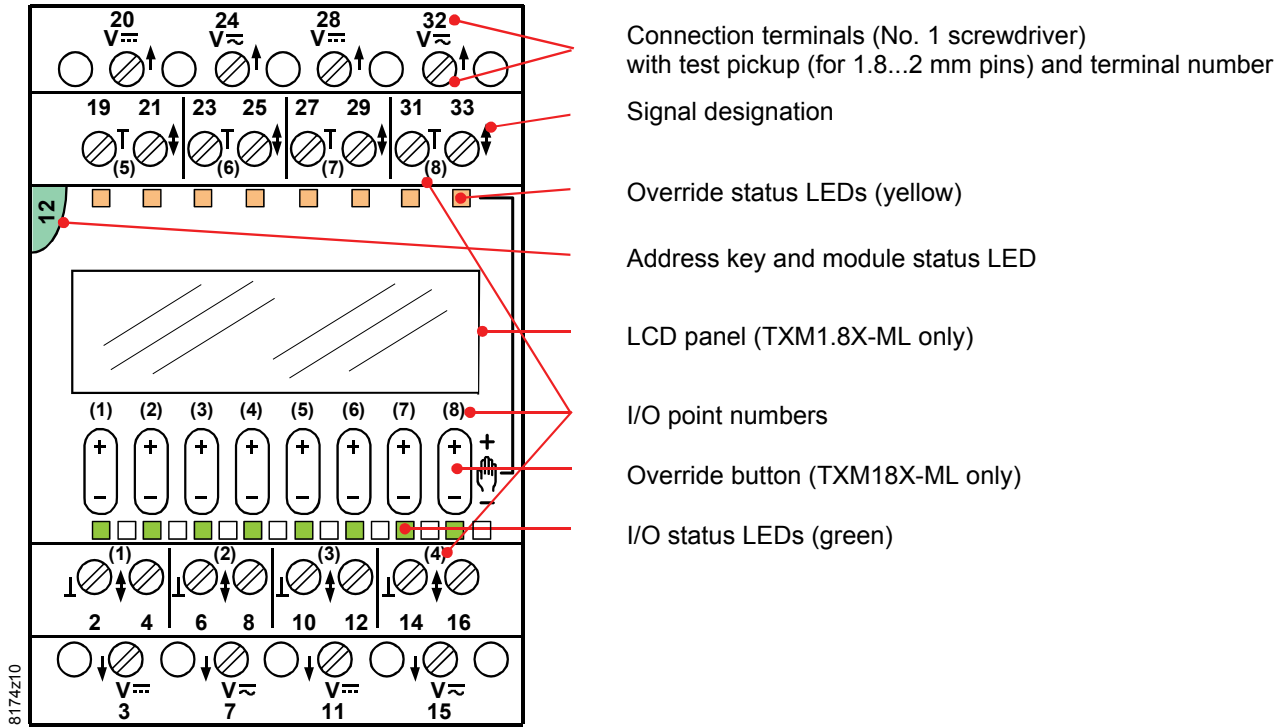

Support of signal types and functions in different building automation and control systems: see TX-I/O Engineering and installation manual, CM110562

Type summary

ASN	Super universal module TXM1.8X Super universal module TXM1.8X-ML with LCD display and local override
Delivery	The terminal base and the electronic plug-in unit are interconnected and delivered in the same box.
Accessories	The available accessories include address keys, label sheets, and spare transparent label holders. Refer to data sheet CM2N8170.

For a description of the features common to all TX-I/O™ modules, please refer to the TX-I/O™ Engineering and installation manual, document CM110562.

Indicators and operator controls

I/O status LEDs

- The I/O status LEDs (green) indicate the status of the inputs and outputs (peripheral devices)
- They are also used for diagnostics

Module status LED

- The module status LED illuminates the transparent address key
- The LED (green) shows the module status as a whole (as opposed to the status of the I/O points)
- It is also used for diagnostics

Address key

- The module operates only with the address key inserted
- The module address is mechanically encoded in the address key
- When replacing the I/O module, the address key must be swiveled outward. It remains plugged into in the terminal base.

Local override and LCD display (TXM1.8X-ML only)

For a detailed description, please refer to document CM110561, "TX-I/O™ Functions and operation".

Override button

- Pressing an button in the middle enables or disables the local override
- Pressing "+" or "-" respectively increases or reduces the output value.
- Only outputs can be overwritten. Any attempt to overwrite an input results in an error indication.

Override status LED

- The yellow "Override" LED indicates that local override is active

LCD display

- The following information is displayed for each I/O point:
 - Configured signal type
 - Symbolic display of process value
 - Information for diagnostics.
- **All safety-relevant functions must be implemented with external solutions**
- **The local override must not be used for safety shutdown operations**
- **In compliance with the standard (ISO 16 484-2, Section 3.110), the module executes all local overrides directly, without safety precautions or interlocks.**
→ Full responsibility lies with the operator. ←

Warning

Module labeling

The plug-in I/O module has a removable transparent cover (the label holder) for insertion of a label.

Disposal

The device is classified as waste electronic equipment in terms of the European Directive 2002/96/EC (WEEE) and should not be disposed of as unsorted municipal waste.

The relevant national legal rules are to be adhered to.

Regarding disposal, use the systems setup for collecting electronic waste.

Observe all local and applicable laws.

Engineering, mounting, installation and commissioning

Please refer to the following documents

Document	Number
TX-I/O™ functions and operation	CM110561
TX-I/O™ Engineering and installation manual	CM110562
Replacement of legacy modules	CM110563

Mounting

Permitted orientation

The TX-I/O™ devices can be installed in any orientation:

It is important to provide adequate ventilation so that the admissible ambient temperature (max. 50°C) is not exceeded.

Technical data

Supply (bus connector on side)	Operating voltage	DC 22.5 ... 26 V
	Extra low voltage SELV or PELV in accordance with HD384	
	Max. power consumption	TXM1.8X 2.2 W TXM1.8X-ML 2.3 W
	(for the sizing of power supplies, see CM110562)	
Protection	All terminals of the modules	Against shortcut and incorrect wiring with AC / DC 24 V
	Bus connector on side	No protection!
Field devices		
Insulation resistance	The of the connected field devices against mains voltage must comply with the requirements for safety extra-low voltage (SELV) or protection by extra-low voltage (PELV) as per HD 384.	
Measuring cables	Cable material	Solid or stranded copper wire
	Cable cross section	See manual CM110562
	Permitted cable length	max. 300 m
DC output (field supply) ( , Terminals 3, 11, 20, 28)	Nominal voltage (derived in the module from the module supply voltage)	DC24 V
	Admissible current per module	Max. 200 mA (total for all 4 terminals)
AC/DC output (field supply)	Voltage	AC / DC 12 ... 24 V
	Admissible current per module	Max. 4 A (total for all 4 terminals)
( , Terminals 7, 15, 24, 32)	Fuse	T 10A, in power supply module / bus connection module
Digital inputs / counter inputs	Digital inputs are not electrically separated from the system electronics. Mechanical contacts must be volt-free. Electronic switches must comply with SELV / PELV standards. <i>Counter inputs faster than 1 Hz that are routed for more than 10 m in the same trunking as analog inputs must be shielded.</i>	
	Contact sensing voltage	DC 21.5 ...25 V
	Contact sensing current	1.0 mA (initial current 6 mA)
	Contact resistance with contacts closed	Max. 200Ω
	Contact resistance with contacts open	Min. 50kΩ

	Min. closing / opening time [ms] including bouncing	Max. bounce time [ms]	Max. Counting frequency (symmetric)
Maintained contact	60	20	
Pulse contact	30	10	
Counter mechanic	20	10	25 Hz
Counter electronic	..5	..0	100 Hz
Counter memory	0 ... 4.3 x 10 ⁹ (32 bit counter)		

Analog inputs

Correction of line resistance	1 Ω (calibrated In module)
-------------------------------	----------------------------

Signal type	Range	Resolution
P1K	0...2500 Ohm	100 mOhm
R2K5	0...2500 Ohm	100 mOhm

Resistance Pt 1000 and
resistance transmitter

Temp. measurement

Pt1K 375	-50...180 °C	10 mK
Pt1K 385 1)	-50...400 (600) °C 1)	20 mK
Ni1K 1)	-50...150 (180) °C 1)	10 mK
R1K (LG-Ni 1000)	-50...150 °C	10 mK
T1 1)	-50...130 (150) °C 1)	10 mK
NTC 10K 1)	-40...115 °C 1)	10 mK (25°C)
NTC 100K 1)	-40...125 °C 1)	10 mK (25°C)

1) 180 °C, 600 °C, NTC: only with reduced hum injection

Voltage measurement

U10 2)	0...10 V	1 mV
--------	----------	------

2) In case of open connection: negative voltage -3.1 V, 0.05 mA (open circuit detection)

Current measurement

I420	4 ... 20 mA	1 μA
I25	0 ... 20 mA	1 μA

(25 mA see CM10563)

Load resistance

490 / 440 ohms, pulsing

(cyclic interrogation of the I/O points)

Analog outputs

Signal type	Range	Resolution
Y10S	0 ... 10 V	1 mV
Output current	max. 1 mA	
Output current I/O points 5 ... 8 only)		
Y420	4 ... 20 mA	1 μA
Output voltage	ca. DC 15 V	
Load resistance	0 ... 500 Ohm	

Connection terminals

Mechanical design	Rising cage terminals
Solid conductors	1 x 0.5 mm ² to 4mm ² or 2 x 0,6 mmØ to 1.5 mm ²
Stranded conductors without connector sleeves	1 x 0.5 mm ² to 2.5 mm ² or 2 x 0,6 mmØ to 1.5 mm ²
Stranded conductors with connector sleeves (DIN 46228/1)	1 x 0.25 mm ² to 2.5 mm ² or 2 x 0,6 mmØ to 1.5 mm ²
Screwdriver	Slot-headed screws Screwdriver No. 1 <i>with shaft diameter ≤ 4.5 mm</i>
Max. tightening torque	0.6 Nm

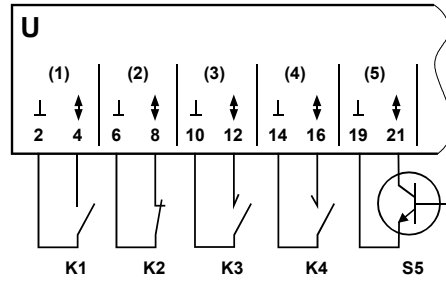

Test pickups (test terminals)

For pin diameter	1.8 ... 2.0 mm
------------------	----------------

Local override (TXM1.8X-ML only)	Local override / indication device	ISO 16 484-2, Section 3.11
Classification to EN 60730	Mode of operation of automatic electrical controls	Type 1
	Contamination level	2
	Mechanical design	Protection class III
Housing protection standard	Protection standard to EN 65029	
	Front-plate components in DIN cut-out	IP30
	Terminal base	IP20
Ambient conditions	Operation	To IEC 60721-3-3
	Climatic conditions	Class 3K5
	Temperature	-5 ... 50 °C
	Humidity	5 ... 95 % rh
	Mechanical conditions	Class 3M2
	Operation	To IEC 60721-3-2
	Climatic conditions	Class 2K3
	Temperature	-25...70 °C
	Humidity	5 ... 95 % rh
	Mechanical conditions	Class 2M2
Standards and directives	Product standard	
	Automatic electronic controls for household and similar use	EN 60730-1
	Electromagnetic compatibility	
	Immunity (domestic & industrial)	EN 60730-1
	Emissions (domestic & industrial)	EN 60730-1
	CE conformity	
	EMC Directive	2004/108/EC
	C-tick conformity	
	Emissions	AS/NZS 61000-6-3
	UL approbation	UL 916, UL 864
Environmental compatibility	The product environmental declaration CM1E8174 contains data on environmentally compatible product design and assessments (RoHS compliance, materials composition, packaging, environmental benefit, disposal)	ISO 14001 (Environment) ISO 9001 (Quality) SN 36350 (Environmentally compatible products) 2002/95/EC (RoHS directive)
Color	Terminal base and plug-in I/O module	RAL 7035 (light gray)
Dimensions	Housing to DIN 43 880, see "Dimensions"	
Weight	Without / with packaging	TXM1.8X 194 / 215 g TXM1.8X-ML 211 / 232 g

DC +24 V operating voltage ³⁾	Selected from: 3, 11, 20, 28 ³⁾							

- 1) All measuring / system neutral terminals are interconnected, not in the terminal base but in the plug-in I/O module. When this unit is pulled outward (into the "parking" position) there is no connection.
 - The system neutral of a digital input can be connected to any system neutral terminal
 - With analog inputs and outputs, the measuring / system neutral must always be connected to the terminal associated with that I/O point.
- 2) All **AC/DC** 24V supply terminals are interconnected (in the I/O module, not in the terminal base). They are protected in the **power supply module / bus connection module**.
- 3) All **DC 24 V** supply terminals are interconnected. They are protected in the **module** against shortcut and incorrect wiring.

For wiring details refer to the TX-I/O™ Engineering and installation manual, CM110562.
